

#### Platforms:

- The keynote & plenary, CE, paper presentations, and a Q&A session for meeting with poster presenters will be done over Zoom.
- Poster presenters will record short (5-minute) videos explaining their poster, which will be posted on the new MWCMLA YouTube channel. Links to these videos will be sent to registrants before the conference. They'll also be included in the post-conference email with links to the recordings.
- The posters themselves will be stored on the [OSF page for the conference](#).

#### What's Being Recorded:

- Paper presentations, lightning talks, the plenary session, and the keynote address will be recorded and made available to registrants on the YouTube channel after the conference. The audience Q&A for each of these will be recorded together with the presentation itself.
- The CE, and the Q&A session with the poster presenters, will **not** be recorded.

#### Accommodations:

- Live captioning will be provided for the keynote address and the plenary session.
- Other Zoom sessions will not have live captioning, but Zoom's automated captioning option will be available. Note that this is typically less accurate than transcription by a person.
- The YouTube videos for the posters will have captions.
- After the conference, the recordings posted on YouTube will have captions that are reviewed and corrected for accuracy.

Contact for Tech Help: Jarrod Irwin ([jirwin10@emich.edu](mailto:jirwin10@emich.edu)) AND Ximena Chrisagis ([ximena.chrisagis@wright.edu](mailto:ximena.chrisagis@wright.edu)). For the quickest possible response, emailing us both is a good idea, especially during the conference.
